### NIORBARA RIVER AND MISSOURI RIVER LEGISLATION

Mr. DASCHLE. Mr. President, earlier this year I introduced S. 1672, the Missouri River Erosion Control Act of 1998. It will create an important new program to provide homeowners on the Missouri River with the assistance they need to protect their homes from shoreline erosion.

Today, my colleague Senator JOHNSON and I are introducing a second bill that I hope will help to preserve the character of the Missouri River for generations to come. Up and down the Missouri River, South Dakotans can tell you that the river is slowly changing as a result of the dams built under the authority of the Pick-Sloan Act. While the dams undoubtedly have made positive contributions to South Dakota by controlling floodwaters and making affordable electricity available to promote rural development, they also ended the Big Muddy's ability to carry a full sediment load for long distances. Sediments are now being deposited into shallow areas of the river, causing the water table to rise, flooding shoreline lands and worsening erosion. In addition, the sediment build-up has made navigation nearly impossible in some areas.

These problems have grown particularly severe near the city of Springfield, where a delta is forming downstream from the confluence of the Missouri and Niobrara Rivers. In order to better understand the causes of the sediment build-up and to develop solutions to address it, I am introducing legislation today to direct the Corps of Engineers to conduct a study of the lower Missouri and Niobrara River watershed. It is my hope that this study will provide the blueprint necessary to alleviate the sediment build-up, reduce future sedimentation, and preserve the character of the rivers for years to come. I hope my colleagues will give this legislation their full support.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.
